

ANIMAL REPRODUCTION

Official journal of the Brazilian College of Animal Reproduction

v.1, n.1

October/December

2004

Editor-in-Chief

Luiz Renado de França - UFMG, Brazil

Co-Editor-in-Chief

Eduardo Paulino da Costa - UFV, Brazil
Fernanda da Cruz Landim-Alvarenga - UNESP, Brazil

Editorial Board

Antônio Carlos S. Castro - UFMG, Brazil
Arlindo A. Moura - UFC, Brazil
Brian Setchell - University of Adelaide, Australia
Eduardo Leite Gastal - University of Wisconsin, USA
George E. Seidel Jr - Colorado State University, USA
Hugo P. Godinho - PUC/Minas, UFMG, Brazil
Parvathi K. Basrur - University of Guelph, Canada
Rex A. Hess - University of Illinois, USA
Ricardo S. Calandra - IMBICE, IBYME, Argentina
Rüdiger W. Schulz - Utrecht University, The Netherlands
Stanley P. Leibo - University of New Orleans, Audubon Research Center, USA
Wilma de Grava Kempinas - UNESP, Brazil

Animal Reproduction publishes reviews and original articles related to the basic, applied and biotechnological aspects of animal reproductive biology.

Manuscripts should be submitted online to the Editor-in-Chief <http://www.cbra.org.br/animreprod>. Instructions to Authors are available at <http://www.cbra.org.br/animreprod>.

Animal Reproduction (ISSN 1806-9614) is published quarterly and wholly owned by the Brazilian College of Animal Reproduction - BCAR (Colégio Brasileiro de Reprodução Animal - CBRA). Subscriptions and renewals are based on the calendar year. **AR** is freely available to the members of the BCAR (CBRA).

All the correspondence should be sent to the following address:

EDITORIAL

The Brazilian College of Animal Reproduction is proudly celebrating this year its 30th anniversary and organizing the 15th International Meeting on Animal Reproduction (ICAR), which for our pleasure is taking place in Brazil. We also have been publishing the Brazilian Journal of Animal Reproduction during the past 28 years. This conjunction of special events, and the awareness we are reaching maturity, made us very confident in pursuing new challenges and horizons. In this context we are now launching a new international journal in the field of Animal Reproduction, whose aims are to publish reviews and original articles related to the basic, applied and biotechnological aspects of animal reproductive biology. We are fully aware that this will be a difficult task. However, we are working very hard to make this a successful journal with the hope of fulfilling a long-standing need in Latin America by providing an excellent avenue for publications in this important and productive field of science. In this regard, we ask that you submit your next work for publication in our journal and we appreciate very much those scientists who kindly submitted their best research, which is now being published in the inaugural issue of *Animal Reproduction*.
